

Life isn't easy. As a *living thing* you have to find food, a mate, somewhere to take shelter, and *make sure your offspring survive*. You may need to fight, cooperate with other species, or find another way to get around problems. Or you could make yourself look *better or fiercer* than your rivals, *develop some weapons*, or use sneaky tricks to *disguise yourself*. *Strategy and tactics* will help you to survive.
