

The most expensive hotel room in Las Vegas costs \$100,000 a night!

Las Vegas

With round-the-clock neon lights and endless flashy attractions, Las Vegas, Nevada, is a super-popular tourist spot. Here you can bungee jump from the top of the Stratosphere Tower, eat in a celebrity chef's restaurant, and see world-famous singers onstage.

Lake Tahoe

Nevada may be dry and arid today, but millions of years ago, it was a lush green land full of lakes! Lake Tahoe gives us a glimpse of that long-gone past. It's an oasis amid Nevada's desert climate.

Nevada gets less rain per year than any other state.

Ancient rock art

Ancient, unknown inhabitants of this region created rock art called petroglyphs. Some of the art is nearly 15,000 years old! The Winnemucca Lake area has the oldest known petroglyphs in the United States.

We don't know what the art means or how it was made.
