

How many groups of apples do we have in these fruit bowls?

3 lots of 3 apples.

$3 \times 3 = 9$ apples in total.

How many fish are in these fish bowls?

2 lots of 4 fish.

Multiplication is a quick way of adding up the same number over and over again.

$2 \times 4 = 8$ fish in total.

Can you match up these addition and multiplication sums?

$$4 \times 7$$

$$3 + 3 + 3$$

$$7 \times 4$$

$$4 + 4 + 4 + 4 + 4 + 4 + 4$$

$$3 \times 3$$

$$7 + 7 + 7 + 7$$

Tip for grown-ups

Adding and multiplying will be easier to understand if you start by drawing the number groupings or using homemade counters.
