

Time filler:

What times tables will help you solve these problems: What is the perimeter of a regular pentagon with 4-cm-long sides? What is the area of a square with 6-cm-long sides? What is the volume of a cube with 3-cm-long sides?

- 7 A cuboid has 8 vertices. How many cuboids will have a total of 80 vertices?

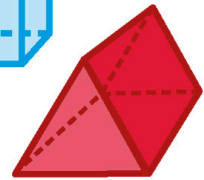

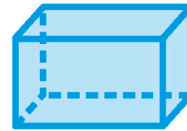

cuboids

- 8 How many faces do these shapes have?

7 triangular prisms

9 cuboids

12 cylinders

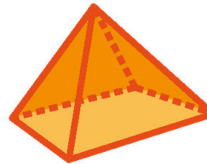

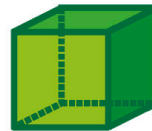

- 9 How many edges do these shapes have?

7 cubes

4 square-based pyramids

3 hexagonal prisms

- 10 What is the volume of this cuboid?

Hint: Volume = length x breadth x height
