

Time filler:

Another way to work out the answer to $6 \times$ a number is to multiply the number by 3 and then double the answer. Choose some numbers between 1 and 20 and give this a go.

123

- 6 Divide each number by 6:

18

30

66

72

96

- 7 £2.50 is shared equally among 6 children. How much money is left over?

- 8 174 cars are parked in 6 rows of equal length. How many cars are there in each row?

cars

- 9 Work out these division sums:

$$\begin{array}{r} \square \\ 6 \overline{)90} \end{array}$$

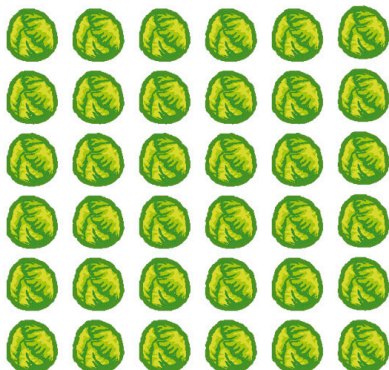

$$\begin{array}{r} \square \\ 6 \overline{)102} \end{array}$$

$$\begin{array}{r} \square \\ 6 \overline{)204} \end{array}$$

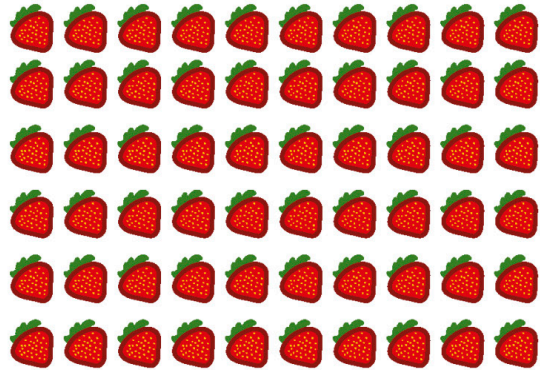

$$\begin{array}{r} \square \\ 6 \overline{)276} \end{array}$$

$$\begin{array}{r} \square \\ 6 \overline{)348} \end{array}$$

- 10 How many items are there in each group?

cabbages

strawberries
