

Division

Use your times tables know-how
To work out division questions now.

- ① Match each question to its answer:

$168 \div 6$

$524 \div 4$

$595 \div 7$

$729 \div 9$

85

81

28

131

- ② Use the long division method to work out each sum:

$$\begin{array}{r} \square \\ 4 \overline{)648} \end{array}$$

$$\begin{array}{r} \square \\ 2 \overline{)496} \end{array}$$

$$\begin{array}{r} \square \\ 5 \overline{)760} \end{array}$$

$$\begin{array}{r} \square \\ 6 \overline{)822} \end{array}$$

- ③ What is the remainder each time?

$592 \div 3$ $\square$

$264 \div 7$ $\square$

$786 \div 4$ $\square$

$543 \div 9$ $\square$

- ④ Circle all the multiples of 7:

14

23

35

43

76

84
