

Time filler:

Another way to work out or check the answer to $11 \times$ a number is to multiply the number by 10 and then add on the number to the answer. For example, $23 \times 11 = (23 \times 10) + 23 = 253$. Choose some 2-digit numbers and give this a go.

- 6 Divide each number by 11:

22 88 121 143 176

- 7 Work out these division sums:

11 $\overline{)187}$
11 $\overline{)297}$
11 $\overline{)363}$
11 $\overline{)572}$
11 $\overline{)781}$

- 8 How many spots are there in each group?
