

Answers:

159

104–105 Groups of 10

106–107 Multiplying by 100 and 1 000

104

① Tiya had 7 parcels. Each parcel weighed 10 kg. How much did the parcels weigh altogether?

70 kg 

② Complete these sequences:

10 20 30 40 50 60 70 80 90 100

150 140 130 120 110 100 90 80 70 60

270 280 290 300 310 320 330 340 350 360

③ Answer these questions:

Ten eights are 80

Ten times ten is 100

Nine multiplied by ten is 90

④ Zina saved 35 10-pence coins. How much money did Zina have altogether?

£3.50 

⑤ Work out these multiplication sums:

$\begin{array}{r} 436 \\ \times 10 \\ \hline 4\,360 \end{array}$	$\begin{array}{r} 845 \\ \times 10 \\ \hline 8\,450 \end{array}$	$\begin{array}{r} 152 \\ \times 10 \\ \hline 1\,520 \end{array}$	$\begin{array}{r} 1\,689 \\ \times 10 \\ \hline 16\,890 \end{array}$	$\begin{array}{r} 791 \\ \times 10 \\ \hline 7\,910 \end{array}$	$\begin{array}{r} 287 \\ \times 10 \\ \hline 2\,870 \end{array}$
--	--	--	--	--	--

⑥ Divide each number by 10:

10 1 40 4 80 8 120 12 150 15

⑦ Work out these division sums:

$42 \div 10 = 4.2$ $367 \div 10 = 36.7$ $78 \div 10 = 7.8$ $842 \div 10 = 84.2$ $99 \div 10 = 9.9$

⑧ How many leaves are there in each group? Hint: Multiply the number of rows by the number of columns.

80 70

105

Children will know that multiplying by 10 means to make amounts ten times bigger. In the case of decimals, this means moving the decimal point one

place to the right to multiply and moving the decimal point one place to the left to divide.

106

① Multiply each number by 100:

4 400 47 4 700 470 47 000 4 070 407 000

② A box contains 100 T-shirts. How many T-shirts are there in 64 boxes?

6 400 T-shirts 

③ Multiply the number by 100 each time:

3 300 30 000 3 000 000

82 8 200 820 000 82 000 000

④ How many centimetres are there in 84 m?

8 400 cm

⑤ Divide each number by 100:

42 000 420 702 000 7 020

804 200 8 042 6 000 000 60 000

⑥ Multiply each number by 1 000:

7 7 000 82 82 000 146 146 000 150 150 000

⑦ How many grams are there in 7.2 kg?

7 200 g

⑧ How many pence are there in £35?

3 500 p

⑨ A plane flies at a height of 10 668 m. What is this height in kilometres?

10.668 km 

⑩ A colony of army ants has 700 000 ants. As the ants cross a river, 20% of the colony dies. How many ants make it across?

560 000 ants

107

Children will be familiar with the equivalents between metric units of measurement and that metric is based on multiples of 10. Some of these questions require the knowledge that 100 cm = 1 m, 1 000 m =

1 km, and 1 000 g = 1 kg. Also, dividing by 100 helps solve percentage problems, as percent means part per 100.
