① Adam ran 400m in 59 seconds. Jonas took twice as long. How long did Jonas take?

118 seconds

② Three cyclists raced at 58 mph, 63 mph, and 56 mph. What was their average speed?

59 mph

③ These were the results of a season's football games: A win = 5 points, a draw = 3 points, and a loss = 1 point. How many points did each team get?

Football team	Win	Loss	Draw	Points
England	8	2	5	57
United States	7	3	6	56
Japan	7	1	7	57
Brazil	9	2	4	59

④ The winner of a tennis tournament won 4 times the prize money of a semi-finalist. If a semi-finalist received £475 000, how much money did the winner receive?

£1 900 000

⑤ John threw a javelin a distance of 64 m. Amy threw the javelin an eighth ($\frac{1}{8}$) less than John's distance. How far did Amy throw?

56 m

⑥ Seven race car drivers have a total of 1 645 points. What is the average number of points scored?

235 points

⑦ There were 162 rounders players taking part in a tournament. Each team had 9 players. How many teams were there?

18 teams

⑧ The length of a swimming pool is 25 m. This chart shows how many times each child swam that length. How far did each child swim?

Name of child	Number of lengths	Total distance
Harry	10	250m
Jasmine	8	200m
Jamie	6	150m
Heidi	5	125m

127

These yellow pages are also themed and involve using a mix of times tables to solve the sums. Question 2 involves knowing ways to calculate

averages. The amounts need to be added and then divided by the number of amounts, which is three in this question.

128

① A dog eats 3 dog treats a day. How many treats will it eat in 7 days?

21 treats

② Complete each sequence:

0 7 14 21 28 35 42 49 56 63

84 77 70 63 56 49 42 35 28 21

35 42 49 56 63 70 77 84 91 98

③ Answer these questions:

Seven sixes are 42

Eight multiplied by seven is 56

Five groups of seven are 35

④ A train ticket costs £7. How much will 6 tickets cost?

£42

⑤ Work out these multiplication sums:

$\begin{array}{r} 14 \\ \times 7 \\ \hline 98 \end{array}$	$\begin{array}{r} 20 \\ \times 7 \\ \hline 140 \end{array}$	$\begin{array}{r} 35 \\ \times 7 \\ \hline 245 \end{array}$	$\begin{array}{r} 59 \\ \times 7 \\ \hline 413 \end{array}$	$\begin{array}{r} 123 \\ \times 7 \\ \hline 861 \end{array}$	$\begin{array}{r} 246 \\ \times 7 \\ \hline 1722 \end{array}$
--	---	---	---	--	---

⑥ Divide each number by 7:

0 0 21 3 49 7 77 11 98 14

⑦ Seven books cost £35.84 altogether. If each book was the same price, what was the price of 1 book?

£5.12

⑧ Work out these division sums:

$\begin{array}{r} 12 \\ 7 \overline{)84} \end{array}$ $\begin{array}{r} 20 \\ 7 \overline{)140} \end{array}$ $\begin{array}{r} 15 \\ 7 \overline{)105} \end{array}$ $\begin{array}{r} 19 \\ 7 \overline{)133} \end{array}$ $\begin{array}{r} 32 \\ 7 \overline{)224} \end{array}$

⑨ Share 42 chairs equally around 7 tables. How many chairs will you keep around each table?

6 chairs

⑩ How many shapes are there in each group?

49

21

129

Some of the time fillers provide tips on how to calculate or check the answers to certain times tables. Knowing a variety of methods supports

understanding of the concepts of multiplication and division.
