## 130-131 Days of the week 132-133 Dice and cards

130

① How many days are there in 15 weeks?  
105 days

② How many weeks are there in 7 years?  
364 weeks

③ How many hours are there in a week?  
168 hours

④ Dad works 35 hours a week. How many hours does he work over 4 weeks?  
140 hours

⑤ Fran cycles for 30 minutes every day. How many minutes does she cycle in one week?  
210 minutes

⑥ A bookshop opens for 7 hours each day from Monday to Saturday. How many hours is it open in one week?  
42 hours

⑦ Chris practises on the keyboard for 105 minutes every week. He does an equal amount of time every day. How long is each practice?  
15 minutes

⑧ Ella travelled for 91 days. How many weeks is this?  
13 weeks

⑨ Dad books a holiday 22 weeks before going. How many days does the family have to wait?  
154 days

⑩ How long in minutes does Kim do these daily activities in one week?  
Watching 45 minutes of television: 315 minutes  
Playing 30 minutes of computer games: 210 minutes  
Reading for 1 hour 10 minutes: 490 minutes

131

132

① Multiply the two numbers shown on the dice:  
 $2 \times 3 = 6$   
 $4 \times 3 = 12$   
 $5 \times 3 = 15$   
 $6 \times 3 = 18$

② Add the numbers shown on the dice, and then multiply your answer by 6.  
 $(2 + 3) \times 6 = 30$   
 $(4 + 3) \times 6 = 42$   
 $(5 + 3) \times 6 = 48$   
 $(6 + 3) \times 6 = 54$

③ Jack threw a double six 5 times. What was his total?  
60

④ These are the scores of four players. They each need to throw a double to reach 100 points. What is the number that needs to appear on both dice for each player? Fill in the spaces in the table.

| Player | Score | Number required on both dice |
|--------|-------|------------------------------|
| 1      | 90    | 5                            |
| 2      | 98    | 1                            |
| 3      | 94    | 3                            |
| 4      | 88    | 6                            |

⑤ Jess throws a die 100 times and records her scores. What is the total amount scored altogether by Jess? Fill in the spaces in the table.

| Number on die | Number of times thrown | Total |
|---------------|------------------------|-------|
| 1             |                        | 16    |
| 2             |                        | 40    |
| 3             |                        | 54    |
| 4             |                        | 60    |
| 5             |                        | 85    |
| 6             |                        | 84    |
|               | Total                  | 339   |

⑥ A full deck of cards has 13 cards of each suit.  
Note: There are 4 suits in a deck.  
How many cards are there in a deck?  
52 cards

How many cards are there in  
4 decks? 208 cards  
9 decks? 468 cards  
6 decks? 312 cards

Multiply each of these cards by 8:  
9 hearts 72  
8 diamonds 64  
Queen (12) clubs 96
