120-121 Beat the clock 1 144-145 Beat the clock 2

These Beat the clock pages test your child's ability to quickly recall times tables facts. The tests require your child to work under some pressure. As with most tests of this type, tell children before they start not to get stuck on one question, but to move on

and return to the tricky one later if time allows. Encourage your child to record his/her score and the time taken to complete the test, then to retake the test later to see if he/she can improve on his/her previous attempt.
