

## Answer section with parents' notes

### Times Tables Practice

This 8-page section provides answers to all the activities in this chapter.

This will enable you to mark your child's work or can be used by them if they prefer to do their own marking.

The notes for each page help explain the common pitfalls and problems and, where appropriate, give indications as to what practice is needed to ensure children understand where they have gone wrong.

175

### 2x table

Count in 2s, colour, and find a pattern.

|    |    |    |    |    |
|----|----|----|----|----|
| 1  | 2  | 3  | 4  | 5  |
| 6  | 7  | 8  | 9  | 10 |
| 11 | 12 | 13 | 14 | 15 |
| 16 | 17 | 18 | 19 | 20 |
| 21 | 22 | 23 | 24 | 25 |

Write the answers.

$$1 \times 2 = 2 \quad 2 \times 2 = 4 \quad 3 \times 2 = 6 \quad 4 \times 2 = 8$$

$$5 \times 2 = 10 \quad 6 \times 2 = 12 \quad 7 \times 2 = 14 \quad 8 \times 2 = 16$$

$$9 \times 2 = 18 \quad 10 \times 2 = 20 \quad 11 \times 2 = 22 \quad 12 \times 2 = 24$$

How many ears?

5 lots of 2  $5 \times 2 = 10$  ears

2 lots of 2  $2 \times 2 = 4$  ears

8 lots of 2  $8 \times 2 = 16$  ears

4 lots of 2  $4 \times 2 = 8$  ears

Children should realise that multiplying by 2 is really the same as adding 2 repeatedly.  $2 \times 3$  is the same as  $2+2+2$ . Help them realise that the pattern they have coloured has all even numbers. Can they use this to tell you whether 27 or 31 is in the 2x table?

176

### Multiplying by 2

Write the sums.

|                                                                          |                                                                          |
|--------------------------------------------------------------------------|--------------------------------------------------------------------------|
| <p>How many pairs of feet?</p> <p>2 lots of 2 = 4</p> <p>2 x 2 = 4</p>   | <p>How many pairs of feet?</p> <p>4 lots of 2 = 8</p> <p>4 x 2 = 8</p>   |
| <p>How many pairs of feet?</p> <p>7 lots of 2 = 14</p> <p>7 x 2 = 14</p> | <p>How many pairs of feet?</p> <p>6 lots of 2 = 12</p> <p>6 x 2 = 12</p> |
| <p>How many pairs of feet?</p> <p>5 lots of 2 = 10</p> <p>5 x 2 = 10</p> | <p>How many pairs of feet?</p> <p>1 lot of 2 = 2</p> <p>1 x 2 = 2</p>    |

Draw different pictures to go with these sums.

Child's drawing

$$8 \times 2 = 16$$

Child's drawing

$$10 \times 2 = 20$$

Can children say what they see in the picture (e.g. 3 lots of 2 feet) before they read the number sentence? Ask children to set out objects like building bricks in 'lots' of 2.

177

### Dividing by 2

Share the eggs equally between the nests.

|                    |                   |
|--------------------|-------------------|
| <p>10 ÷ 2 = 5</p>  | <p>4 ÷ 2 = 2</p>  |
| <p>6 ÷ 2 = 3</p>   | <p>8 ÷ 2 = 4</p>  |
| <p>12 ÷ 2 = 6</p>  | <p>16 ÷ 2 = 8</p> |
| <p>20 ÷ 2 = 10</p> | <p>14 ÷ 2 = 7</p> |

Do children know that the ÷ sign means sharing things out into equal groups or piles? Small buttons can represent the eggs and they can actually share these out between the two smaller nests each time. At this stage lots of practical work is important.
