

Mixed tables

Write the numbers that the raindrops are hiding.

$$\begin{array}{lcl}
 4 \times 5 = 20 & & 2 \times 4 = 8 \\
 20 \div 4 = 5 & & 8 \div 2 = 4 \\
 1 \times 3 = 3 & & 2 \times 3 = 6 \\
 3 \times 1 = 3 & & 6 \div 3 = 2 \\
 3 \times 9 = 27 & & 45 \div 5 = 9 \\
 5 \times 9 = 45 & & 8 \times 2 = 16 \\
 16 \div 2 = 8 & & 10 \times 6 = 60 \\
 60 \div 10 = 6 & & 3 \times 4 = 12 \\
 10 \times 6 = 60 & & 12 \div 4 = 3 \\
 7 \times 5 = 35 & & 5 \times 10 = 50 \\
 35 \div 5 = 7 & & 50 \div 10 = 5
 \end{array}$$

Children need to know the 2x, 3x, 4x, 5x, and 10x tables for this page. It is important to know that multiplication and division are 'opposite' (inverse) operations. So they should know that if $4 \times 5 = 20$ and $5 \times 4 = 20$, then $20 \div 4 = 5$ and $20 \div 5 = 4$.

Mixed tables

$$\begin{array}{lcl}
 10 \rightarrow 2 & & 18 \rightarrow 9 \\
 35 \rightarrow 7 & & 20 \rightarrow 10 \\
 45 \rightarrow 9 & & 12 \rightarrow 6 \\
 20 \rightarrow 4 & & 2 \rightarrow 1 \\
 16 \rightarrow 4 & & 12 \rightarrow 4 \\
 8 \rightarrow 2 & & 6 \rightarrow 2 \\
 4 \rightarrow 1 & & 15 \rightarrow 5 \\
 12 \rightarrow 3 & & 9 \rightarrow 3 \\
 80 \rightarrow 8 & & 90 \rightarrow 9 \\
 30 \rightarrow 3 & & 100 \rightarrow 10
 \end{array}$$

Children should try to do this exercise using purely mental calculations. Can they talk themselves through the exercises using mathematical sentences such as, ' $35 \div 5$... means how many lots of 5 in 35 ... 7 fives are 35... so $35 \div 5 = 7$ '?

Mixed tables

$$\begin{array}{lcl}
 7 \rightarrow 14 & & 2 \rightarrow 6 \\
 8 \rightarrow 16 & & 5 \rightarrow 15 \\
 10 \rightarrow 20 & & 1 \rightarrow 3 \\
 3 \rightarrow 6 & & 4 \rightarrow 12 \\
 5 \rightarrow 10 & & 3 \rightarrow 9 \\
 5 \rightarrow 20 & & 9 \rightarrow 45 \\
 3 \rightarrow 12 & & 0 \rightarrow 0 \\
 4 \rightarrow 16 & & 6 \rightarrow 30 \\
 2 \rightarrow 8 & & 8 \rightarrow 40 \\
 1 \rightarrow 4 & & 10 \rightarrow 50 \\
 8 \rightarrow 80 & & 6 \rightarrow 60 \\
 10 \rightarrow 100 & & 2 \rightarrow 20 \\
 5 \rightarrow 50 & &
 \end{array}$$

If children know their tables well, they might find it challenging to do this page as a 'race against the clock' by using a kitchen timer, for example. If you cover their answers, they could have a second race and try to beat their own time!
