

## The rest of the 7s

You should now know all of the 2, 3, 4, 5, 6, and 10 times tables.

You only need to learn these parts of the 7 times table.

$$7 \times 7 = 49 \quad 8 \times 7 = 56 \quad 9 \times 7 = 63 \quad 11 \times 7 = 77 \quad 12 \times 7 = 84$$

This work will help you remember the 7 times table.

Complete these sequences.

7      14      21      28      35      42                       

$6 \times 7 = 42$       so       $7 \times 7 = 42$  plus another 7 =

21      28      35                             

$7 \times 7 = 49$       so       $8 \times 7 = 49$  plus another 7 =

7      14      21                              56            70

$8 \times 7 = 56$       so       $9 \times 7 = 56$  plus another 7 =

7            21      28      35                             

Test yourself on the rest of the 7 times table.

Cover the section above with a piece of paper.

What are seven sevens?

What are eight sevens?

What are twelve sevens?

What are eleven sevens?

$8 \times 7 =$         $7 \times 7 =$         $12 \times 7 =$         $11 \times 7 =$

How many days are there in eight weeks?

A packet contains seven felt-tips.

How many felt-tips will there be in nine packets?

How many sevens make 56?
