

Times tables for division

This page will help you remember times tables by dividing by 2, 3, 4, 5, 6, and 7.

$14 \div 7 = 2$

$28 \div 7 = 4$

$84 \div 7 = 12$

Complete the sums.

$21 \div 7 = \square$

$77 \div 7 = \square$

$84 \div 7 = \square$

$35 \div 5 = \square$

$28 \div 7 = \square$

$35 \div 5 = \square$

$14 \div 2 = \square$

$24 \div 6 = \square$

$35 \div 7 = \square$

$18 \div 6 = \square$

$24 \div 4 = \square$

$24 \div 6 = \square$

$20 \div 5 = \square$

$24 \div 2 = \square$

$21 \div 3 = \square$

$15 \div 3 = \square$

$21 \div 7 = \square$

$70 \div 7 = \square$

$36 \div 4 = \square$

$42 \div 7 = \square$

$42 \div 7 = \square$

$55 \div 5 = \square$

$18 \div 3 = \square$

$32 \div 4 = \square$

$18 \div 2 = \square$

$49 \div 7 = \square$

$27 \div 3 = \square$

$15 \div 5 = \square$

$36 \div 4 = \square$

$16 \div 4 = \square$

$48 \div 4 = \square$

$36 \div 3 = \square$

$42 \div 6 = \square$

$25 \div 5 = \square$

$40 \div 5 = \square$

$45 \div 5 = \square$

$7 \div 7 = \square$

$70 \div 7 = \square$

$84 \div 7 = \square$

$63 \div 7 = \square$

$24 \div 3 = \square$

$24 \div 3 = \square$

$42 \div 7 = \square$

$42 \div 6 = \square$

$14 \div 7 = \square$

$24 \div 2 = \square$

$48 \div 6 = \square$

$24 \div 4 = \square$

$54 \div 6 = \square$

$54 \div 6 = \square$

$18 \div 3 = \square$

$28 \div 7 = \square$

$60 \div 6 = \square$

$56 \div 7 = \square$

$30 \div 6 = \square$

$66 \div 6 = \square$

$63 \div 7 = \square$

$35 \div 7 = \square$

$25 \div 5 = \square$

$48 \div 6 = \square$
