

Let's go shopping again

Each of these coins is worth **5** pence.

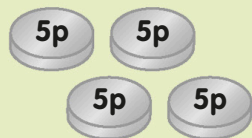

I hope I
can afford that
football.

If you have **3** coins, they are worth **15 pence** because $5 \times 3 = 15$.

If you have **7** coins, how much are they worth?

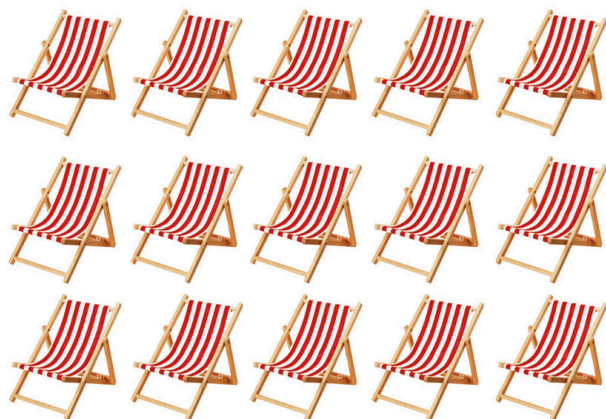

If you have **4** coins, how much are they worth?

If you have **9** coins, how much are they worth?

If you have **6** coins, how much are they worth?

How many deckchairs are there?

How many buttons are there?
