

6x

How bee-wildering

These multiplications from the **6x** table have got all mixed up. Can you work out what they should say?

Did you know?

Whether you add them up or multiply them together, these numbers will still make **6**!

$$1 + 2 + 3 = 6$$

$$1 \times 2 \times 3 = 6$$

$$\begin{array}{cc} 1 & \times \\ = & 2 \\ & 2 \end{array} \quad \begin{array}{c} 6 \end{array}$$

The answer is
 $6 \times 2 = 12$

Now try these for yourself.

$\begin{array}{cc} \times & 4 \\ 5 & = 9 \\ & 6 \end{array}$	$\begin{array}{cc} 3 & = \\ 0 & 5 \\ & 6 \end{array} \times$	$\begin{array}{cc} 7 & \times \\ 2 & = 6 \\ & 1 \end{array} \quad \begin{array}{c} 2 \end{array}$
	$\begin{array}{cc} & 1 \\ 6 & = \\ \times & 6 \end{array}$	

How many sides are there on the hexagons on this page?

Sandcastles

You have built **6** sandcastles, and want to divide the decorations you have equally between them. How many of each decoration will you put on each castle?

18 flags

24 starfish

48 shells

66 pebbles

$18 \div 6 = 3$
so there will be
3 flags
on each sandcastle
