

7x

Patterns in the seven times table

Look at the pattern in this grid. These are the **first digits** for each answer (up to 9×7) in the $7\times$ table.

These grids will help you to remember the $7\times$ table.

The number at the end of each is also the first number of the next line.

0, 1, 2 ... 2, 3, 4 ... 4, 5, 6

Now try this one.

There's another special pattern in this grid. Start at the top right and read down, and you'll see the numbers 1 to 9.

This grid gives the **final digits** for each answer (up to 9×7) in the $7\times$ table.

What happens if we put our two grids together?

These are the answers to the $7\times$ table!
