

# 8×

## Division with remainders

When you can't divide a number equally, some will be left over. This leftover portion is called a remainder. To divide **19** by **8**, count down from **19** until you find a number that is in the **8** times table.

16 is the nearest multiple of 8.

$$19 \div 8 = 2, \text{ remainder } 3$$

19, 18, 17, 16...

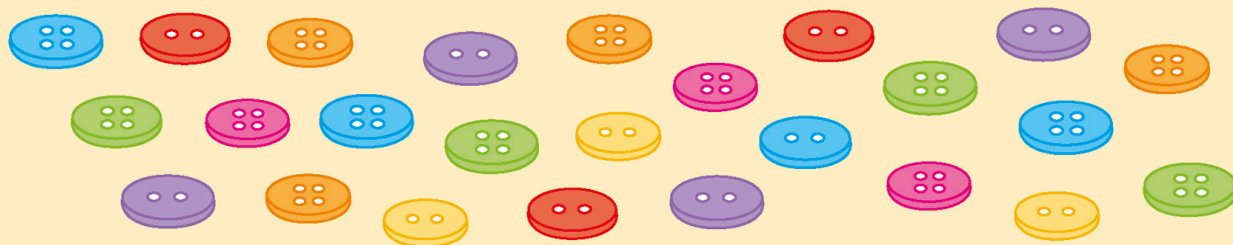

How many times does **8** go into **16**?

**The answer is 2.**

How many are left over as a remainder?

$$19 - 16 = 3$$

What is the answer to  $25 \div 8$ ?

What is the answer to  $12 \div 8$ ?

What is the answer to  $18 \div 8$ ?
