

12x

You've made it to the
12 times table.
Well done!

Here's the 12 times table:

1	×	12	=	12
2	×	12	=	24
3	×	12	=	36
4	×	12	=	48
5	×	12	=	60
6	×	12	=	72
7	×	12	=	84
8	×	12	=	96
9	×	12	=	108
10	×	12	=	120
11	×	12	=	132
12	×	12	=	144

The twelve times table

This is the last times table to learn – or do you know it already? We've already covered **143** of the **144** equations from the **1** to **12** times tables, so now there should only be one equation you don't know.

The 12x table – fast

I know the
10x table.

And I know the
2x times table.

By adding together these
two tables, you can quickly
find the answers to the
12x table!

How many candles on these **5** birthday cakes?

How many hearts are on these **3** wedding cakes?

How many coloured sweets on these **4** chocolate cakes?
