

On the road

The first automobile was a steam-powered cart that set off in 1769 at a top speed of 2.5 mph (4km/h). Over the years, many clever inventions have helped shape modern motor vehicles. Today, more than one billion travel along the world's roads.

1769

French
inventor

Nicolas-Joseph
Cugnot builds the first
working automobile.

1868 The first
traffic lights
are installed in
London. Not long
afterward,
they explode!

1885

The Benz Motorwagen, the
first wheeled vehicle powered
by an internal combustion
engine, takes to the road.

1927

The Napier-Campbell
Blue Bird sets a
land-speed record of
195 mph (314 km/h).

Blue Bird

1850

German engineer Nikolaus
Otto builds the first internal
combustion engine.

1876

The first
traffic lights
are installed in
London. Not long
afterward,
they explode!

1900

1894

In Germany, Hildebrand
and Wolfmüller build
the Motorrad, the first
production motorcycle.

1880

Several inventors
develop so-called
"safety bicycles"
driven by a pedal and
chain mechanism.

1908

The Ford Model T goes
on sale in the USA. It
becomes the first car
to be mass-produced on
an assembly line.

1871

The High Wheeler, the first
bicycle with big front wheels to
boost speed, is designed.

1916 The

first fully working
armored tank, the
Mark 1, goes into battle
in France in World
War I.
