with pest-removing chemicals. Come harvest time, different machines speed up the collection of crops, such as the **New Holland Braud 960L**, which travels above rows of vines, harvesting grapes, or the **Pumpkin Harvester**, which picks, washes, and packs pumpkins. Large combine

harvesters, such as the **John Deere S690**, cut the stalks of cereal crops, separate the grain, and shoot the remaining straw out the back. This straw is packed into hay bales that can be lifted by forklifts, such as the **Caterpillar TH406**, or held by grippers, as on the **New Holland 740TL**.
