

MONSTER LEAP At the Monster Mania festival in the UK, Ian Batey flies high in his *Lil' Devil* monster truck over a row of old cars. Fueled by high octane racing methanol in its hefty V8 engine, this powerful vehicle boasts ten times as much power as a regular family car. It weighs more than 8,800 lb (4,000 kg)—guaranteeing a crushing ending for any of the wrecked cars should it land on them.
