

# Fun on wheels

Land

**Unicycle** France 1800s

*Padded seat supports back*

**Velocar** France 1933

*Backrest includes lockable trunk and rear lights*

**Kingcycle** UK 1990s

**Windcheetah SL Mark VI Speedy** UK 1981

Riders experience **“rubber legs”** when they try a new style of bike and use new muscles.

*Dropped handlebars with brakes for the rider at the back*

**Santana Triplet** USA 2000s

If you think all bicycles feature just one rider sitting upright, supported by two wheels, think again! Many variations on the bicycle's basic design have been attempted for greater speed, more comfort, or just for fun.

A **unicycle** has a single wheel, turned by pedals, and demands great balance from the rider to stay on. Three-wheelers are easier to ride, and some, such as the **Pashley Tri.1**, even offer a platform to carry large loads. Tandem bicycles, such as the **Dawes Galaxy Twin**, have two riders pedaling,
