Rear tire with 18 in (45 cm) diameter, 3¼ in (9.4 cm) width

KMZ Dnepr MT11 Russia 1985

Various types of motorcycles have been designed for road use, from standards to cruisers. Most standards offer a relatively upright riding style and have smooth tires. Cruisers are bigger, with a reclining back and relaxed riding position for long rides.

Standard motorcycles are ideal for riding around town and for short journeys. Popular midsize engine bikes in the 1970s included the **BMW R60/6** and the **Honda CB550**, with a top speed of 102mph (164km/h) from its 500 cc engine. For long-distance riding, cruisers are more
