

PLANET DATA

DIAMETER 2,160 miles (3,476 km)

AVERAGE DISTANCE FROM EARTH
238,900 miles (384,400 km)

ROTATION PERIOD 27.3 Earth days

SURFACE TEMPERATURE -240 to
+250°F (-150 to +120°C)

Unseen Moon

This view of the Moon cannot be seen from Earth; the Earth-facing side is at lower left. The impacts that produced the Moon's large craters cracked the crust so badly that lava flooded the crater floors. It then solidified, producing the darker areas.
