

The Moon

The Moon is a small, rocky world that is orbiting, or travelling around, the Earth. Let's take a closer look.

Do you like my space buggy? The proper name for it is a lunar roving vehicle and it runs on batteries.

Last manned
Moon landing

Apollo 17
11 December 1972

Apollo 11
20 July 1969

First Moon
landing

Apollo 16
21 April 1972

Apollo 12
19 November 1969

Apollo 14
5 February 1971

Apollo 15
30 July 1971

Moon crater

Moon landings

Humans first set foot on the Moon in 1969. The flags show where each Moon mission touched down on the surface.
