

Technology

Technology uses science to create inventions. Often the aim of these inventions is to make our lives easier. Engineers use a series of steps to come up with new and exciting products.

1

A problem

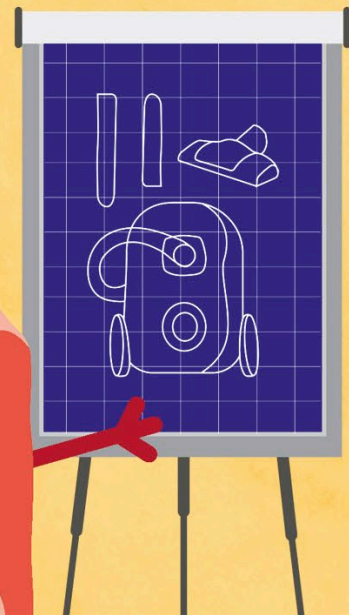

The first thing to do is to find the problem that needs solving. Ask questions to find out as much as you can so that you can properly understand the whole problem.

Hmm, this cat makes so much mess! I wish I had a way of easily cleaning up...

2

Tubes make great linking devices.

This tube looks like it will be large enough to pick up tiny bits of dirt and big pieces of paper.
