

Electricity

Electricity is a type of energy that is used to power many everyday objects, from light bulbs to TVs. Take a look around your home and see how many electrical devices you can spot.

Power lines carry electricity over long distances – from power stations into our homes.

Electrical gadgets make my life easier at home! Although I wish someone else would do the hoovering...

Batteries

Batteries are small objects that can create their own electricity. They're often used for remote controls, radios, and torches.
