Engaging

Engaging while stretching

Stretching

ALIGNMENT

Although your arms appear to be 180 degrees overhead, they are in a safe range of slightly less flexion. Your spine is neutral or in a slight backbend.

Takes pressure off shoulders

VARIATION

For those who have an injury, a health condition, or don't want to get on the floor, the chair version is a great option. Also try it with your hands on a wall or desk.

Thighs and lower legs

Your **hip flexors** engage, **quadriceps** extend your knees, and **adductors** stabilize your thighs and hips. Your **hip extensors** and **plantar flexors** stretch. Your **ankle dorsiflexors** engage as you press your heels toward the ground.
