

» CLOSER LOOK

Headstand can be safely practiced with little to no pressure on the head and neck. It has many health benefits, from improving respiratory and shoulder function to helping you better regulate your blood pressure.

Menstruation

From a yoga perspective, inverting during menstruation could interfere with the natural downward flow of energy (*apana vayu*), which could be reason enough to avoid inversions during menstruation. However, from a medical perspective, there is no scientific evidence yet to support these claims. Choose what feels right for you.

**Pressure and balance**

A modern way of practicing Headstand, and perhaps the safest, involves only allowing 0–10 percent of your weight to rest on your head. Cradle your head in your forearms so it barely touches the ground. Press firmly into your forearms, reaching your feet upward energetically.
