

## Thighs

Your **hip extensors**—including your **gluteus maximus**—engage, while your **hip flexors** stretch. Your **quadriceps** engage while lengthening, synergizing with your **hamstrings** to stabilize your thighs. Your **adductors** engage as you squeeze your thighs in toward parallel.

## ALIGNMENT

Engage your inner thighs, bringing them toward parallel. Look up toward the sky and avoid turning your head while in the pose.
