

SPINAL CARE

Your spine supports your whole body and protects your spinal cord, so looking after it is crucial for your health and well-being. Yoga helps care for your spine by encouraging good posture and alignment, but you may need to make simple adjustments to prevent or manage specific conditions and diseases.

Leaning forward over a smartphone can increase the load on the neck by **5** times.

Q I SUFFER FROM NECK PAIN FROM TEXTING AND TYPING. CAN YOGA HELP?

Yes. While typing or texting, many of us allow our heads to fall forward. This increases the load on the neck and upper back muscles. With sustained strain, these muscles become inflamed and excessively tight, which can lead to pain. Yoga improves your awareness of how

you hold your head throughout the day, which can prevent tech neck. To counteract its effects, you can also strengthen key muscles of proper neck posture by pressing your head back into your hands, a wall, or a car headrest for several breaths.

Optimal alignment of the head over the body minimizes muscular effort

Neck and upper back muscles become fatigued when head is out of alignment

TECH NECK

When you lean forward, you bring your head out of alignment, which effectively makes it heavier. The more you bring it forward, the heavier the load on your spine.
