

BOUND ANGLE

Baddha Konasana

Bound angle pose is a seated hip opener and groin stretch. It can relieve pelvic cramping, and this version of the pose also improves your ankle flexibility and awareness, which will come in handy in balancing poses.

THE BIG PICTURE

Your inner thighs stretch, particularly around your groin. If you can reach, this is also an opportunity to stretch your ankle muscles by opening your feet like a book revealing its pages.

KEY

- Joints
- Muscles
- Engaging
- Engaging while stretching
- Stretching

ALIGNMENT

Your spine is stabilized into neutral and, in this version of the pose, your pelvis is also neutral. Your thighs rest in a rotated outward position.

Arms

As you reach toward your feet with flexed elbows, your **brachialis** flexes your elbow with the help of the **biceps brachii** and **brachioradialis**.

Lower legs

Your **tibialis anterior** muscles dorsiflex your ankles, and your **extensor digitorum** muscles extend your toes. If you are using your hands to manually invert your feet, your **fibularis** muscles are stretching.
