

ALIGNMENT

Your abdomen is compressed as you release your body weight down. Drop your head, allowing your forehead to rest on the floor or use a bolster or blankets for support.

KEY

••• Joints

○ Muscles

● Engaging while stretching

● Stretching

Torso

With your spine in slight flexion, your **spinal extensors** stretch. In particular, when you inhale and exhale deeply with awareness, the small, deep muscles along your spine stretch gently.

Intercostal muscles

Spinal extensors

Spine

Quadratus lumborum

Thighs and lower legs

Your **quadriceps** and **gluteus maximus** stretch while you try to release all the muscles around the thighs. Your **dorsiflexors** may be stretching while your feet rest in plantar flexion.

Rectus femoris

Vastus lateralis

Gluteus maximus

Tibialis anterior

Extensor digitorum longus

Extensor hallucis longus
