

Emiliaia coccolithophore, page 34

Emiliaia huxleyi

Group: Coccolithophores

Width: 0.01 mm (0.0004 in)

Location: Worldwide

Giant kelp, page 36

Macrocystis pyrifera

Group: Brown algae

Length: 45 m (148 ft)

Location: Worldwide

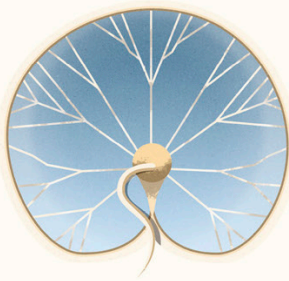

Diatom, page 38

Aulacodiscus oregonus

Group: Diatoms

Width: 0.1 mm (0.004 in)

Location: Worldwide

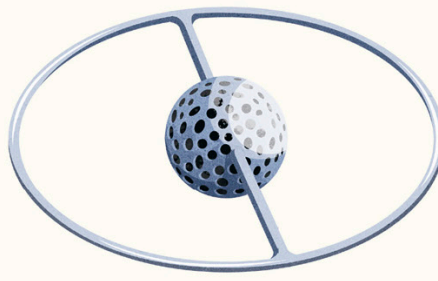

Sea sparkle, page 40

Noctiluca scintillans

Group: Dinoflagellates

Width: 0.5 mm (0.02 in)

Location: Worldwide

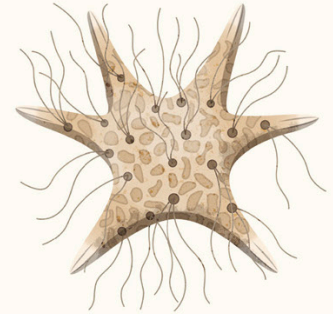

Radiolarian, page 42

Saturnulus planetes

Group: Radiolarians

Width: 0.2 mm (0.008 in)

Location: Worldwide

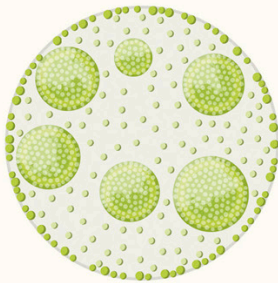

Japanese star sand, page 44

Baculogypsina sphaerulata

Group: Foraminifera

Width: 1.5 mm (0.06 in)

Location: Western Pacific Ocean

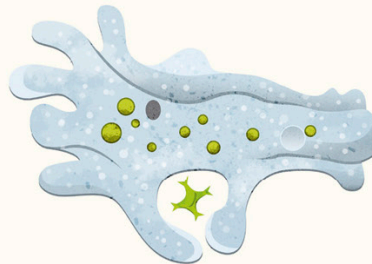

Golden volvox, page 46

Volvox aureus

Group: Green algae

Width: 1 mm (0.04 in)

Location: Worldwide

Proteus amoeba, page 48

Amoeba proteus

Group: Protozoa

Length: 0.3 mm (0.01 in)

Location: Worldwide

Fly agaric, page 50

Amanita muscaria

Group: Fungi

Height: 30 cm (12 in)

Location: Worldwide

Reindeer lichen, page 52

Cladonia rangiferina

Group: Green algae and fungi

Height: 10 cm (4 in)

Location: The Arctic

Water bear, page 54

Paramecium caudatum

Group: Invertebrates

Length: 1.5 mm (0.06 in)

Location: Worldwide

Temora copepod, page 56

Temora stylifera

Group: Invertebrates

Length: 1.4 mm (0.06 in)

Location: Atlantic Ocean
