

Cardboard Candelabra

The charming candelabra Lumière brightens Belle's stay at the Beast's castle. Cheer up your room with your own Lumière. You just need cardboard, paint, glue – and voilà!

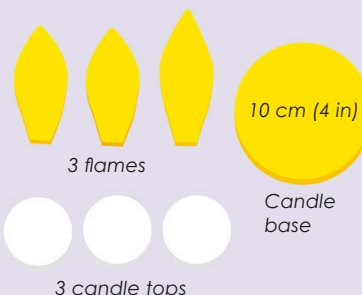

You will need:

- Pencil and black pen
- Cardboard
- Scissors
- Ruler
- Cardboard egg carton
- 3 cardboard tubes
- Acrylic paint
- Paintbrush
- Glue
- 3 yellow pipe cleaners
- 2 googly eyes

Get prepared

Begin by cutting the cardboard shapes you need and painting them white or yellow.

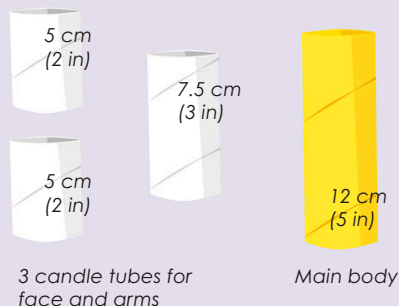

- 1 Cut three flames, one circular base and three round candle tops from cardboard.

- 2 Slice five cups from an egg carton.

- 3 Carefully trim the cardboard tubes to the below lengths.

Assemble Lumière

Once the paint is dry, work your own magic to bring the pieces together.

- 1 Cut a short slit in the bottom of all three flames. This creates two flaps.

- 2 Carefully make a slit the width of a flame in every candle top.

- 3 Now slot a flame into each candle top. Bend the flaps back and glue in place.

- 4 Once the candle tops are dry, glue them onto the candle tubes.

- 5 Using a pencil, make two tiny holes on opposite sides of the top of the tube.

- 6 To build the stand, glue the yellow tube into an egg cup. Then glue the egg cup onto the circular base.

- 7 Twist three pipe cleaners together to make one thicker strand. This single length will make both of Lumière's arms.

- 8 Push the arms through the two holes in the body until the pipe cleaners on each side are the same length.

- 10 Glue two egg cups into the body tube and stick the longest candle tube on top.

Add detail to the candle flames with orange paint.

- 9 Pierce a tiny hole in the bottoms of two egg cups with a pencil. Thread one onto each arm. Untwist the top of the pipe cleaners, spread the ends out and glue them down.

- 11 The two remaining tubes will be the candle hands. Glue them into the cups on each arm.

- 12 Stick on two googly eyes and use a black pen to complete Lumière's friendly face.
