

Concertina Cards

Dress your cards to impress with these fancy ball gowns. Pop-up cards are easy to make with this crafty technique. You will soon have 3D princesses bursting out of your greeting cards.

You will need:

- Tracing paper
- Coloured cardstock
- Pencil
- Scissors
- Glue stick
- Double-sided tape

Dress up your cards

The 3D skirts are made by cutting several skirts and sticking them together.

- 1 Draw or trace the silhouette of your favourite princess (a Cinderella template is on page 63) onto coloured cardstock, such as silver. Carefully cut it out.

- 2 Using the silhouette as a template, draw out just the dress on a different-coloured cardstock. Cut it out.

Match this cardstock to the princess's dress colour.

- 3 Copy the skirt part of the dress onto the dress-colour cardstock four times and cut them out.

You could cut the edge of the card to make a decorative pattern.

Tiana

Sleeping Beauty

A head turned to the side makes a better silhouette than one facing forward.
