

DID YOU KNOW?

The Cave of Wonders is hidden beneath the Arabian desert. It's here that Aladdin meets the Magic Carpet and finds the lamp with its powerful Genie.

TOP TIP

Place your characters at different heights on the dowels for a more interesting composition on the stage.

Tiger's head hides the edges of the shoebox.

Puppets are staggered to create a 3D effect on stage.

Make the puppets

The puppets are controlled from above with wooden dowels. Each one can be inserted through one of the slits you made in the top of the box.

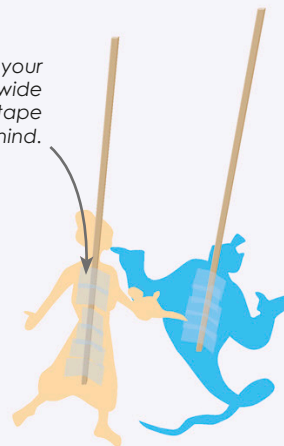

1 Draw the characters on cardstock and cut them out.

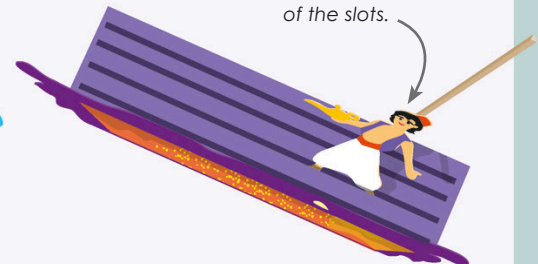

2 Add details to the characters with coloured card or felt-tip pens.

Make your characters wide enough to tape the dowels behind.

3 Tape a wooden dowel to the back of each character.

Thick cardstock will make your puppets strong and prevent damage when they're moved in and out of the slots.

4 Insert the dowels through the slits in the top of the box.
