

Make a mermaid

The colours of this mermaid are for Ariel, but you could make any of her sisters, or your own creation.

1 Lay the clothes peg down with the rounded end at the top for a head.

2 Decide how far up the tail will come, draw a "V" shape and paint everything below it.

3 Paint a seashell top. Ariel's tail is green, and her top is light purple.

4 Draw a tail shape on craft foam and cut it out.

5 Slot the foam tail inside the clothespin. If needed, add glue or an extra wedge of foam to hold it in place.

6 Cut a length of thread long enough to wrap around the head three times. Glue it in place.

7 Cut 12 pieces of thread nearly twice the length of the clothes peg.

Stick the hair behind the thread you added in step 6.

8 Bunch the 12 threads together, fold them in half and glue them to the top of the head.

9 Style the hair any way you like. You might need to add extra glue to the back of the head.

10 Paint a simple face, such as two eyes and a smile.

11 Once the paint and glue are dry, paint any extra details you like and add glitter for underwater sparkle.

TOP TIP

Mark out the clothes and the top of the tail in pencil before you add paint.

DID YOU KNOW?

Ariel has six sisters named Aquata, Andrina, Arista, Attina, Adella and Alana.
