

Enchanted Rose Glitter Jar

Behold a beautiful enchanted rose! The Beast must find true love before the last petal falls. You can enjoy this glittering rose globe without being under a spell!

Build the stem

The Beast's rose floats in the air, but this one stands on a green clay stem strengthened with wire.

- 1 Make a flat rectangle shape with your green clay, smaller than the height of your jar.
- 2 Cut three strips of wire into pieces 5 cm (2 in) longer than your rose stem. Twist the wires together.

You will need:

- A jar with a lid
- Polymer clay (green and red)
- Modelling wire
- Baking sheet
- Oven
- Strong glue
- Water
- Silk rose petals
- Glitter
- Glycerin

- 3 Lay your wire on the clay, leaving 1 cm (½ in) at the top and 4 cm (1½ in) at the bottom.

- 4 Wrap your clay around the wire, moulding it smooth with your fingers.

- 5 Bend your stem into an "S" shape to look like a real flower stem.

- 6 Make leaf shapes from green clay and attach them to the stem. You could add a vein detail with a fingernail.

- 7 Separate the bottom wire into three to help the stem stand up.

Grow the rose

A beautiful rose is easy to make; just wrap seven clay petals around each other.

- 1 Make petal shapes from the red clay.
- 2 Roll one petal in on itself to form the centre of the rose.

- 3 Wrap six petals around the centre of the rose, bending the top edges of the outer petals outward.

- 4 Stick more petals around the bottom of the stem to cover up the wire.

- 5 Push the rose head onto the wire and give it a little squeeze to make it secure.

- 6 Check that the rose fits inside the jar. Bend the stem more if it is too tall.

- 7 Place the rose on a baking sheet.

- 8 Bake in the oven, following the clay package instructions.

- 9 Once cool, use strong glue to stick the rose onto the inside of the lid. Make sure you can still screw the lid on. Leave upright to dry.

Add magical sparkle

Once your glue is completely dry, it's time to add the finishing touches.

- 1 Fill the jar with water, almost to the top.

- 2 Add a teaspoon of glycerin. Too much might make your glitter clump together, while too little may make it fall too fast.

- 3 Add silk rose petals and a sprinkle of glitter.

- 4 Screw the lid on tightly.

- 5 Shake your jar, place it lid-down and watch the petals fall.

DID YOU KNOW?

An Enchantress's spell turned the Prince into a Beast and bewitched his castle.
