

Cut out the felt

You'll need lots of leaves and petals to make your crown as full as Moana's. Cut out all these parts from felt. You could cut templates from paper and pin them to the felt to guide you.

1 Trace the templates on page 63.

2 Cut out the shapes and pin them onto the felt.

3 Cut the felt shapes out. You will need: 28 dark-green leaves, 14 light-green leaves and seven pink flowers.

Assemble your flower crown

Once you've prepared the parts, all you need to do is sew them together. Then your crown is ready to wear!

1 Stack two dark-green leaves with a light-green one in the middle. Rotate each layer so the leaves fan out. Make seven of these stacks.

2 Sew each stack together with a few stitches in the centre of the leaves. Secure on the back with a knot.

3 Make seven more stacks of leaves. This time, top each stack with a pink flower and a bead.

4 Sew the new stacks together, taking the thread through the bead on top.

5 Stitch each stack onto the elastic. Alternate flower stacks with non-flower stacks. Sew them close together so the leaves overlap and stick out.

The leaf stacks nestle between the flower stacks to create a fuller feel.

DID YOU KNOW?

Moana's name means "Ocean" in many Polynesian languages. It fits her perfectly!
