

Ice hockey

Ice hockey is similar to field hockey, but instead of being played on grass, it's played on **ice** with **skates** strapped on.

Out on the rink

Ice hockey players wear skates and move around an ice court called a **rink**. Instead of a ball, they hit a small disk called a **puck**.

Staying safe

With sharp skates, flying pucks, big sticks, and fast, strong players whizzing around, players need to wear **pads**. The **goalkeeper** has the most dangerous job, so is covered head to toe in **protective clothing**.
