

Water sports

Water sports are activities that take place either **in the water** or **on the water**.

Scuba diving

With an oxygen tank, scuba divers can swim underwater without needing to come up for air.

ON THE WATER

Waterskiing

Water-skiers stand on skis and hold a cable attached to a speedboat. The boat drags the skier across the water.

PWC

Riders stand on a motorized personal watercraft (PWC) and power their way across the water. Some riders race against each other.

Kite-surfing

Kite-surfers stand on a board and use a kite to pull them across the surface of the water.
