

Football

In the United States, football is played in school, at college, and professionally in the National Football League (NFL). Each year, the 32 NFL teams square off to win the big prize: the **Super Bowl**.

Defensive back

Four downs

Teams take turns trying to get the ball in the other team's **end zone** at the end of the field. They get four chances, called **downs**, to move the ball 10 yards by either throwing it or running with it. If the attacking team (the offense) gains 10 yards, it gets four more downs. If it fails, the other team gets the ball.

Wide receiver
