

Fencing

Fencing is a safe version of **sword fighting**.

It's based on the ancient art of swordsmanship, but the modern rules date back to 19th century Europe.

Fencers wear white because before electronic scoring, swords were dipped in ink to show when a hit had landed.

Protective clothing and mask

Dueling dancers

Fencers are fast, skilled, and move like dancers. There's a reason for this—**ballet** began as a dance version of fencing. Many of the movements are very similar.
