

Archery

Archery is the art of using a **bow** to shoot **arrows** at a **target**. The closer an archer gets their arrows to the center of the target, the more points they score.

An ancient art

People have been using bows and arrows for thousands of years. They were originally used for **hunting**, then became a battle weapon before guns and cannons were invented.

During the Middle Ages, archers could shoot between 10–12 arrows a minute.
