

0.75

DECIMAL

A decimal is simply a number that is not whole. It always contains a decimal point.

100% 1 1
75% 0.75 $\frac{3}{4}$
PERCENTAGE DECIMAL FRACTION

$\frac{3}{4}$

FRACTION

A fraction shows a number as part of an equally divided whole.

Everyday numbers to remember

Many decimals, fractions, and percentages are used in everyday life—some of the more common ones are shown here.

Decimal	Fraction	%	Decimal	Fraction	%
0.1	$\frac{1}{10}$	10%	0.625	$\frac{5}{8}$	62.5%
0.125	$\frac{1}{8}$	12.5%	0.666	$\frac{2}{3}$	66.7%
0.25	$\frac{1}{4}$	25%	0.7	$\frac{7}{10}$	70%
0.333	$\frac{1}{3}$	33.3%	0.75	$\frac{3}{4}$	75%
0.4	$\frac{2}{5}$	40%	0.8	$\frac{4}{5}$	80%
0.5	$\frac{1}{2}$	50%	1	$\frac{1}{1}$	100%

Changing a decimal into a fraction

First, make the fraction's denominator (its bottom part) 10, 100, 1,000, and so on for every digit after the decimal point.

$$0.75 \rightarrow \frac{3}{4} \quad \text{divide by highest number that goes into 75 and 100}$$

$$0.75 \rightarrow \frac{75}{100} \xrightarrow{\div 25} \frac{3}{4} \quad \text{Cancel the fraction down to its lowest possible terms.}$$

Decimal number with two digits after the decimal point.

Count the decimal places—if there is 1 digit, the denominator is 10; if there are 2, it is 100. The numerator is the number after the decimal point.

Changing a fraction into a percentage

To change a fraction into a percentage, change it to a decimal and then multiply it by 100.

$$\frac{3}{4} \rightarrow 3 \div 4 = 0.75 \rightarrow 0.75 \times 100 = 75\%$$

divide the denominator (4) into the numerator (3)

For decimal, divide the numerator by the denominator.

Multiply by 100

Fraction

Decimal

Changing a fraction into a decimal

Divide the fraction's denominator (its bottom part) into the fraction's numerator (its top part).

$$\frac{3}{4} \rightarrow 3 \div 4 = 0.75$$

numerator

denominator

Divide the numerator by the denominator.
