

SAY YES TO YELLOW

It's easy to feel mellow if you eat lots of yellow. The outsides may look sunny and powerful, but it's the insides that have the real power – the power to boost your immune system that is!

PEACHES are naturally sweet and succulent. They're perfect with cereal or in a smoothie.

PEPPERS start off green, then change colour as they ripen. All the colours taste slightly different.

SUPER spud

You can do so much with POTATOES, but it's often healthiest to bake or steam them. They fill you up and are a good source of energy.

LEMONS

Not only do lemons bring vibrant flavour to a dish, they bring loads of Vitamin C to your body. Sailors used to eat lemons to avoid a disease called scurvy.

HONEYDEW MELON

is yummy at breakfast or as dessert.
