

BANANAS

According to scientists, bananas make you happy! This is because they contain amino acids that boost your serotonin – a chemical that makes you feel happy. Bananas also contain a special kind of fibre which encourages friendly bacteria in the gut.

Tasty and
TROPICAL

CORN

Crunchy yellow corn is a brain food. It contains Vitamin B1, which is also known as thiamine. Thiamine is a fantastic memory booster, and can improve your everyday thinking – so eat corn before you do your homework!

For thousands of years people have used **GARLIC** as a way to prevent illnesses. Cook with it the next time you have a cold!

PINEAPPLES
Spiky on the outside, but sweet on the inside, pineapples take over a year to grow. Good things come to those who wait!
